

**REPUBLIC OF CROATIA**  
**MINISTRY OF SCIENCE, EDUCATION AND SPORTS**

Zagreb, June 23, 2006

Dear Mr Gabathuler,

It is with great pleasure that I have received information on activities of your honorable institution dedicated to celebration of the Year of Nikola Tesla

As a visionary and a scientist, Nikola Tesla was a man heading before his, and, probably, before our time. His ideal was to serve the entire mankind. Celebrating the Year of Nikola Tesla is the occasion to mark the impressive work of this world-renowned genius. Therefore it is my great pleasure to invite you to join us at the Central Ceremony of the Tesla's Memorial Event which will take place on July 10, 2006 in Smiljan, his birth place.

Your presence at the Ceremony would be of great honor to us and I sincerely hope that you will be able to attend the central event as the representative of the Tesla Society Switzerland. Please note that the Ministry of Science, Education and Sports of the Republic of Croatia will cover the expenses of your visit, including the costs of travel and accomodation during the Ceremony. Taking part in this event would provide an excellent opportunity of discussing the possibilities of our future cooperation, as well as for exchange of views and experiences in science and technology developments with the representatives of the Croatian academic community, together with the leading scientists and high officials from other countries.

I am looking forward to welcome you this July in Croatia, and please accept, Mr Gabathuler, once again the assurances of my highest consideration.

Yours sincerely,

**ASSISTANT MINISTER**

**Radovan Fuchs, Ph. D.**
