Dr. B. A. u. Kollegen

....as there has been a steady erosion in U.S. activity in the basic sciences, there has been an increase in the level of such activity in Western Europe and Japan. If that continues, we are in danger of losing our position of scientific leadership."

Val. L. Fitch, Prof. of Physics at Princeton University, in an interview with U.S. News & World Report, June 21, 1982.

West Germany:

Das ist Müll/D. Reber (nur ein Test)

The prototype of the first motorcycle equipped with a "flux-motor" (the inventor's designation for a tachion field converter or gravity-field generator) of 2 KW output has completed a test run of approximately 20,000 km without repairs. Principle of operation: The T-converter is constantly recharging the electrical power battery of the vehicle, resulting in an operation which is noiseless, fuelless and pollution-free. After completion of all scheduled tests, a public demonstration to the press is planned shortly. A new factory for the production of gravity-energy-field converters, in the town of Oldenburg is scheduled to produce individual home heating units. The design of automobile power plants based on the same principle is also in preparation. Reported efficiency factors of several hundred percent are anticipated.

Japan:

** Das ist Falsch es wurde nur der Test beim TÜV gemacht, ob der Motor O.K. ist C. Kling*

Mazda continues research on the "magnetic Wankel engine" (45 HP) for electric automobiles, based on the principle of Kure Tekko. The gravity research of Prof. S. Seike is now sponsored by Hitachi, after millions of Japanese received updated information via popular science magazines. It is interesting to note that Saudi Arabia has decided to invest \$100 million in Hitachi stocks.

France:

The "Kromrey" converter has completed tests at the Institute for Magnetostatics, University of Strasbourg. One prototype delivered 700 Watts at 600-1200 RPM, at a fairly uniform rate. However, France, as the #1 developer of nuclear energy in Europe, is still reluctant to concentrate her energies on a revolutionary new technology which could result in drastic curtailments of her well-developed nuclear industry and associated efforts.

Denmark:

Dr. Jensen, physicist at the University of Kopenhagen, reported test results of 300% efficiency with a specially designed, 5-coil transformer in connection with a tachion field converter based on the principle of the "N" machine. First reports were presented at the International Conference on Energy Technology in Hannover, Nov., 1980.

C.S.A. National Convocation

Christian, Identity, Patriotic, Survival. October 8,9,10, 1982. FREE Admission - Secluded Guest Speakers: Col. Jack Mohr (Ret. U.S. Army), Bob Miles (Mountain Church), Richard Butler (Aryan Nations). Plus CSA's own instructors and other outside teachers! Plus the establishment of a National CSA Confederacy.

Pre-Registration is Required! For Attendance Registration Form or for information, please write or call: CSA Enterprises, Rt. 1, Box 128, Pontiac, MO 65729. (501) 431-8882
